You will have the ability to search and sort databases. This easy-to-use web database utility also allows you to store your databases on your computer using Excel and pdf export.

A Customer Portal in QuintaDB is a great way for an company or organization to allow its customers or users to log into their dedicated internal web-system and access restricted data with different access level roles. Customer Portal provides you with an excellent opportunity to present your database with a brand identity personal to your company or organization.

Your web-users will be able register on your portal instead of signing up with QuintaDB's account.
They can log into your dedicated web-portal, access modules shared to them like forms, table, charts, maps, calendars, reports and upload their files, add data, and most importantly, view and modify only those records which they submitted.

Team module allows you to add any number of users, team members and to set permissions for them. They can be administrators or members. You can find team members by login or email or invite them to Quintadb.

Collaborate with your colleagues
and build business together!
