ENDING	
CLINICAL CHART	
Antibiotics	Gentamicin drops; 0.3 %; amt: 1 drop; ophthalmic (eye) four times a day for 10 days DX: Blepharitis Four Times A Day. Begin: 03/10/2025 - 03/20/2025 End: 03/20/2025 Meropenem recon soln; 1 gram; amt: 1 gram; intravenous Every 8 Hours. Begin: 03/08/2025 - 03/14/2025 End: 03/14/2025
Other recommendations	Adherence to prescribed treatments. Sepsis is a serious condition that requires completing the full course of antibiotics, maintaining proper hydration, and monitoring vital signs for any worsening symptoms such as fever, confusion, difficulty breathing, or low blood pressure. In addition, Blepharitis Should be managed with good eyelid hygiene, including warm compresses and gentle cleaning with a prescribed solution or baby shampoo to reduce inflammation and bacterial buildup. Avoiding eye rubbing and using prescribed topical medications, if applicable, can help control symptoms. Continue with the Gentamicin drops until 03/20.
